

a **VOICE** for working America **555**

Dan Clay – President Jeff Anderson – Secretary Treasurer

Bargaining Update!

The employers are trying to gut the healthcare benefits that protect you and your families, just to keep even MORE of the money you bring in for your employer.

The employers want to:

- **Increase** the minimum waiting time to receive full health care coverage from 43 months to a minimum of 78 months
- **Increase** annual deductibles by up to 300%
- **Reduce** after deductible coverage to as low as 60%
- **Double** the annual maximum out of pocket costs for some members

You and the service you provide are the reasons for your employer's success.

An offer like this is just plain disrespectful!

This proposal is the worst healthcare offer we have seen! While your employer tries to spin this offer and tell you that they are doing their best to “take care of you,” remember exactly WHO brings in every dollar of profit seen - US the workers. This callous move is just one more attempt to put the profits before the people. First they try and take away our five day work week, and now they want to strip our healthcare plan making us spend more of our hard earned money to receive the healthcare we need. There is no end to the corporate greed! We deserve better and are going to demand better!
